FAITH MAGRAS

SOFTWARE DEVELOPER

PROFILE

Before beginning Software development, I specialized in Video Editing. I hope to integrate the two so that I may be able to develop solutions that incorporate a new dimension of interaction. After doing some independent studies, I enrolled at NSS to formalize my education in software development. I look forward to this journey as a software developer, and positively contributing to the Nashville Tech Community.

PROJECTS

HOMEMADE | REACT

Homemade is an application that allows users to share, learn, and get feedback on ice cream recipes. Users can also search for recipes.

- React JavaScript is used to create the website and use hooks to simplify the code
- CRUD implemented the functionality of the application
- CSS was used to Style cards and buttons
- Cloudinary was used to upload ice cream photos
- View Code : *https://github.com/bdanielle092/HomeMade*

TECHNICAL EXPERIENCE

SOFTWARE DEVELOPER
Nashville Software School

Intensive full-time six-month software development program learning full-stack technologies by creating software applications individually and in the group setting

- HMTL | CSS | Javascript | React | .Net | C# | SQL
- Used CSS to style and position items on my page.
- Used JavaScript and HTML to make web pages for several group and individual projects.
- Please look at my accomplishments or check out my GitHub for more information.
- Virtual experience using Zoom and Slack

Group Projects:

HOLIDAY ROAD | JAVASCRIPT
Holiday Road is a website to helps users pick a vacation spot. The user can choose a park, restaurants, and fun activities around them and see each place's 5-day forecast. Personally responsible for the weather and the styling on the page. I used a weather API to pull the forecast, and used JavaScript to display the information. CSS was used to position the text and icon in the forecast, and to add the background and style to the page.

NUTSHELL | JAVASCRIPT

Nutshell is a dashboard for people to organize their daily tasks, events, news articles, friends, and chat messages. My ticket was the Task section. JavaScript and bootstrap were used to display the task section. The task section had a place to enter a task, checkbox for completion, and delete button. This project was redone in React JavaScript. My tickets were Events and Messages in part 2. Worked on implementing full crud during this project.

PROFESSIONAL EXPERIENCE

TEACHER
Academy of SeaBoard Ln and preschool at southPointe

- Responsibility for having the classroom organized and provide curriculum for the children, alongside my co-teacher
- Responsible for preparing lessons for each day. Prepared fun crafts and activities to do throughout the day

TJ MAX
Womans Coordinator

- Responsible for putting out the product on the floor. Also responsible for cleaning up displays and clearing the fitting room.
- Was responsible for making the displays for the clothing as the women's coordinator

EDUCATION

- NASHVILLE SOFTWARE SCHOOL | 2020
- NASHVILLE COMMUNITY COLLEGE| 2008-2011
